What's New

In Kernel IMAP Backup

This document illustrates the latest updates to Kernel IMAP Backup

Introduction

Kernel IMAP Backup tool allows users to back up their IMAP mailboxes quickly.

It is enhanced with smart features like selective data backup based on filters like date/item type, exclude deleted/empty folders, etc.

The newest version of Kernel IMAP Backup 20.5 is now available with improved IMAP server connectivity and swift mailbox folders expansion.

It even allows the backup of UNICODE email servers. The trial version allows you to backup up to 10 items per folder from an IMAP mailbox.

Latest Enhancements

Kernel IMAP Backup Version 20.5 has the following updates:

➢ Improved IMAP connectivity for IMAP email clients like Gmail, Yahoo, AOL, etc.

➢ Better folder expansion of IMAP mailboxes

➢ Minor bug fixes to improve performance and accuracy

➢ Fast and secure backup of IMAP mailboxes to PST, MSG, EML, PDF formats.

The added features in the latest version have improved the overall speed and accuracy of the Backup process.
